email **info@taurusutilityconsultants.co.uk**

What Will We Do for You?

In a nutshell, we find you the most appropriate tariff and switch your business electricity contract for free.

The work involved includes obtaining your consumption data, matching this to the right supplier, and activating the contract. Other services include invoice reconciliation, ensuring you have the most efficient meters for your property and general advice.

Take advantage of our broker service by using our market comparison quoting system.

Advantages

- A knowledgeable third party handles all your tariff negotiations.
- They can find the right tariffs from a range of over 15,000 options.
- Switching to the new tariff and provider is undertaken on your behalf.
- If you change Supplier, we let your current provider know you are leaving
- This process saves you time and money and ensures you're on the correct rates for your premises.
- We offer additional services such as invoice validation, a cost audit, carbon offset reporting, management software to help reduce consumption and contract reminder services.

How Does This Service Work?

We usually work on a commission basis. We receive complex pricing matrixes from the power companies and add a flexible margin to cover expenses. Your final pricing quote includes any commissions with no additional costs or brokerage fees payable. You won't receive a separate invoice for our services.

"Use Taurus Utility Consultants as we did and put your faith into the professionals. Not only do they negotiate great deals but also give a first class service".

Ann Rielly, Durham Box Company Ltd.

"All my water heating and drying equipment is gas fired so it is important to get the best deal from utilities. I have found over the last three or four years that the best solution is to hand the problem over to Steve and trust in his experience to get me the best price"

Bob Bradley. Owner, St Austell Launderette.
