Calibration & Repair Specialists
Supplier of Instrumentation

AML Instruments, a small family owned business whose Managing Director, Alex Leeson, joined forces with Technical Director David Leeson BEng Hons MSc to use their 30 years experience in the calibration, metrology and aerospace industries and in 2012, after many years of integral involvement with the management of Hanatek Services, purchased the company.

Hanatek Services is a leading UK specialist in calibration, service and repair, providing on-site calibration of new and used measuring and testing equipment for blue chip companies throughout the UK and Europe. Our commitment to providing quality customer care and service has seen us retain long term contracts in excess of fifteen years.

Centrally based in the UK, our largely on-site service minimises 'down time' and the risk of postal damage, whilst using our extensive expertise to offer you a 'one stop' professional service for all your calibration needs. Liaising closely with your employees to ensure your testing can be done with minimum disruption and to the highest standard, enables us to offer you a professional service at competitive rates saving you the time required to organise a number of different calibration services.

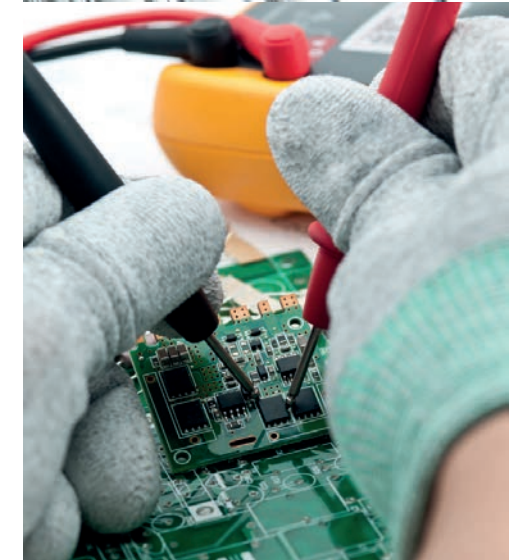

Expertise

Hanatek currently calibrates in excess of 500 instruments for all industries to ISO 9001 approved written procedures. Using our expertise and knowledge gained through specialist services to Paper, Board, Packaging and Plastics companies, our engineers are able to provide excellent calibration services to a multitude of industries. We have experience in calibrating and repairing old and obsolete alongside modern instruments.

The parameters we calibrate include:

- Dimensional
- Mass
- Humidity
- Flow
- Electrical
- Pressure
- Temperature
- Force
- Velocity
- Torque
- Gloss
- Opacity
- Volume

We also supply a large range of instrumentation including Balances, Tensile Testers, Friction Testers, Micrometers and Thickness Gauges and Ovens. With a number of years' experience in the metrology and materials testing, we can provide advice and guidance on selecting the correct equipment or manufacture bespoke testing systems for your organisation. With contacts in a number of leading manufacturers we are able to supply you the best instrument for the job at a very competitive price.
