

About Taurus Utility Consultants

We are an established independent energy consultancy with a rapidly increasing customer base, having access to some of the best account managers in the industry that cover all major suppliers and some specialist suppliers that are unique to the commercial market. Our clients benefit from a high level of service for both sales and customer service enquiries along side a solid platform for getting the best business terms available on the market. Our scope of excellence covers your needs for energy procurement, energy management, telecoms procurement and Renewable Energy services.

Taurus Utility Consultants are a subsidiary of the parent company, The Taurus Corporation Ltd, founded in Newcastle upon Tyne in 2007. We have rapidly become a fully comprehensive utility consultancy after strategic partnership agreements with buying groups, which allow us to source the cheapest possible contract prices on your behalf.

"We pride ourselves on the service we provide our clients, from minor billing issues and full account management. Our staff will manage the process for you giving you peace of mind".

Stephen Dobson, Managing Director.
