

# About Codeblue

- Established in 2006 in Ireland and Expanding into the UK Market in 2021, Codeblue Medical can deliver a tailored package of Emergency Department doctors, nurses and paramedics to ensure a seamless support structure for Major Sporting Events and Festival Promoters – ranging from a solo paramedic to a fully-equipped, 24-hour field hospital with ambulance support.
- Thousands of event attendees each year receive expert on-site medical attention from Codeblue personnel both in the UK and Ireland.
- We are confident we can offer the best on-site support for any sized event throughout the UK. Codeblue can provide the entire range of medical support services, covering everything from planning to risk assessment, drafting the medical plan, liaising with hospitals and statutory organisations to the provision of a fully equipped multi-bay resuscitation field hospital with emergency Advanced Life Support.
- We can provide Emergency Department standard Medical Facilities complete with a range of hospital grade specialist equipment, medications and patient trolleys including the appropriate RSI medications, outside the hospital setting in the United Kingdom and Ireland.

# UK Management Team

- Thomas Giffney – CEO & Founder
- David Weeks – Operations Manager
- Dr Nasir Ali – Medical Director - Consultant Emergency Medicine (Clinical Lead Emergency Medicine, Queens University Hospital Birmingham)

# About Our Wider Team

- Our personnel are registered with their relevant professional bodies and are backed up by a robust system of clinical and procedural governance, ensuring they are always operating to best practice standards.
- We use front-line emergency staff from Emergency Departments, General Practice and the Statutory Emergency Ambulance Services (999). This ensures our team are clinically up-to-date and properly certified in emergency care including: BLS, ILS, ALS, PALS, ATLS, MIMMS and so on.
- Our Command and Control structure dovetails with our clinical provisions and your Event Control framework seamlessly, creating harmonious working in a potentially stressful environment.
- We're CQC Registered, which allows us to legally operate both Ambulance Transportation Services (Taking Casualties to Hospital without relying on the local NHS) and Treatment of Disease, Disorder or Injury (Allowing our Clinicians to operate skill sets above those of "Basic" First Aid).

# Knowledge, Experience and Expertise

We provide a complete suite of medical support services, covering everything from planning to risk assessment; from the provision of a fully equipped, five-bay resuscitation field hospital and emergency ambulances to the services of a lone first aider.
